

Student 1 Submission & Feedback Fall 2021

Hi {Student},

Thank you for your submission of this final website project. You did very well on designing to your target audience! You identified your target audience as males and females in the United States, aged 35-45 with above average computer skills. Your color scheme here is appropriate for both males and females. Your font size is an appropriate size for this age range, and your navigation is placed at the top center, which is where this group will look for the menu. The size of the navigational buttons is medium-small, which is still large enough to see, but not too large that it takes away from the viewable area dedicated to the site.

Anne
